

2023 MACHINE LEARNING & AI PROGRAM FOR RPS STUDENTS

October 2, 2023
9:30 AM to 2:00PM
Dewey Gottwald Center
Science Museum of Virginia

GISTEM

presents

Thinking Big with Big Data

POWERED BY  Microsoft

200

seats available

A one-day, in-person event on big data concepts, including machine learning and AI, for 9th - 12th grade Richmond Public Schools students.

PROGRAM AND INSIGHTS

HANDS-ON ACTIVITIES

The event will provide several hands-on activities for students through STEM workshops and an exhibit that explores motion and time across science and tech.

EXPOSURE

The event will introduce young talent to machine learning and artificial intelligence-based careers through workshops by leading tech organizations.

WHY BIG DATA MATTERS

There is a need for professionals that understand how to interpret data in order to make better business decisions. It is important to expose students to these topics and careers at an early age.
